Quick Assembly Guides
Quick assembly instructions

1. **Confirm sterility**
   - Note: if you cannot confirm sterility do not use

2. **Mount proximal carriage (1-4-0) on support bars (1-0-1), leave 5 mm exposed**
   - Attach clamps (1-0-3) and tighten nuts (1-0-8)

3. **Mount distal carrier (1-2-0) on support bars (1-0-1)**
   - Attach clamps (1-0-3) and finger tighten nuts (1-0-8)

4. **Insert calcaneal wire frame threaded rod (1-3-0) through calcaneal brace (1-3-2)**
   - Ensure bush is distal, screw on traction nut (1-2-2)
   - Insert calcaneal wire frame assembly through distal brace (1-2-0)
   - Screw on traction nut (1-2-2)
   - leave 10 mm of thread protruding

5. **Pre-assemble wire tensioning assembly (1-0-4, 1-0-6)**
   - Ensure wire tensioner nut (1-0-6) is at the very end of travel
   - Leave in tray

6. **Pre-assemble left and right translation arms (1-5-0L, 1-5-0R)**
   - Ensure translation arm block is central and two lines are visible on arm and column
   - Leave in tray

Quick disassembly instructions

1. Remove wire tensioners (1-0-4, 1-0-6) and wire locks (1-0-5) → Dismantle wire tensioners and place all components in tray

2. Remove translation arms (1-5-0L & 1-5-0R) → Dismantle translation arms and place in tray

3. Remove traction nut (1-0-5-4) and place in tray → Remove calcaneal wire frame and distal rest

4. Remove rotation lock wheel (1-2-2) and place in tray → Dismantle calcaneal wire frame (1-3-0) and rest (1-3-2) and place in tray

5. Remove clamps (1-0-3), and place clamps & nuts (1-0-8) in tray → Remove distal carrier (1-2-0) and place in tray

6. Remove clamps (1-0-3) and place in tray → Remove proximal carrier (1-4-0) and place in tray

7. Place support bars (1-0-1) in tray

8. Clean* → Sterilise* → Package, store

* See cleaning and sterilisation instructions

Quick assembly instructions (translation arms)

1. Hold block (1-5-4), with text facing upwards, insert sleeve (1-5-0-2) from the top
   - Screw column (1-5-0-1) into (1-5-0-2) up to middle line
     - Note: You will need to push slightly to engage

2. Push sleeve (1-5-0-4) into block (1-5-4) from the ‘part number’ side
   - Screw arm (1-5-0-3) into (1-5-0-4) up to middle line
     - Insert screw (1-0-2) from opposite side of text, do not tighten

3. Locate assembly so that flat on stem (1-5-0-3) is opposite knob of screw (1-0-2)
   - Ensure that block (1-5-4) is central and tighten screw (1-0-2)

4. Place guide (1-5-8) on arm pointing down and insert screw (1-5-9) through the slot in guide (1-5-8)
   - Screw nut (1-5-10) onto screw (1-5-9), tighten lightly with guide at 45 degrees

5. Leave nut (1-0-8) and clamp (1-0-3) in tray
